```
public SimpleCmd readCommand() throws IOException {  
    String commandName = readName();  
    try {  
        Class cmdClass = classloader.loadClass( commandName); //  
        ClassNotFoundException  
        SimpleCmd cmd = (SimpleCmd) cmdClass.NewInstance(); //  
        Cms.setArgs( readArgs() );  
        return cmd;  
    } catch (Exception e) {  
        throw new IOException( "unknown command" + commandName);  
    } /* endcatch */  
}
```
